

# compact BIOFILTRATION

## Xport BioBlock

- Available in 1.5" and 2.0" cubes to fit in many hang on the back filters, canister filters or even placed in sumps
- Genuine Xport material with more surface area than any other filtration medium in the world
- Over 10 times more surface area than the next competitor
- Wicks water, holds moisture for days during power outages, so the bacteria is still alive and filtration can continue once power is restored
- Contains natural aragonite for pH control at the bacteria level
